Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A card comprising:
 - a display device comprising a first semiconductor element comprising a first polycrystalline semiconductor film;
 - a first thin film integrated circuit comprising a second semiconductor element comprising a second polycrystalline semiconductor film;
 - a first substrate; and
 - a second substrate,wherein the display device is electrically connected to the first thin film integrated circuit,
 - wherein the first thin film integrated circuit and the display device are covered and sealed with a resin between the first substrate and the second substrate of the card,
 - wherein the resin is in contact with the second substrate; and
 - wherein the first substrate and the second substrate comprise a plastic material.
2. (Original) A card according to claim 1, wherein the card has a thickness from 0.05 mm through 1.5 mm.
3. (Previously Presented) A card according to claim 1, wherein the display device is a passive matrix type display device.
4. (Previously Amended) A card according to claim 1, wherein the display device is an active matrix type display device.

- 3 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

5. (Previously Presented) A card according to claim 1, further comprising:
a second thin film integrated circuit,
wherein the first and second thin film integrated circuits are laminated.
- 6.-8. (Canceled)
9. (Previously Presented) A card according to claim 1, wherein the display device is a liquid crystal display device.
10. (Canceled)
11. (Previously Presented) A card according to claim 1, wherein the display device is a light emitting device.
12. (Canceled)
13. (Previously Presented) A card according to claim 1, wherein the card is an ID card.
14. (Canceled)
15. (Previously Presented) A card according to claim 1, wherein the card is a semi-hard card.
16. (Canceled)

- 4 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

17. (Previously Presented) A card according to claim 1, wherein the card is an IC card.

18.-19. (Canceled)

20. (Previously Amended) A card comprising:
a first substrate comprising a plastic material;
a display device comprising a first semiconductor element comprising a first polycrystalline semiconductor film over the first substrate;
a first thin film integrated circuit comprising a second semiconductor element comprising a second polycrystalline semiconductor film over the first substrate;
a resin over the display device and the first thin film integrated circuit; and
a second substrate comprising a plastic material over the resin,
wherein the resin is in contact with the second substrate.

21. (Currently Amended) A card according to Claim 5, further comprising an insulating film,
wherein the display device and one of the first and second thin film integrated circuit circuits are in contact with the insulating film.

22. (Previously Presented) A card according to Claim 1, further comprising:
an antenna; and
an insulating film,
wherein the display device, the first thin film integrated circuit and the antenna are in contact with the insulating film.

23. (Previously Presented) A card according to Claim 1, wherein the display device comprises a third substrate.

- 5 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

24. (Previously Presented) A card according to claim 20, further comprising a second thin film integrated circuit comprising a third semiconductor element comprising a third polycrystalline semiconductor film;

wherein the first and second thin film integrated circuits are laminated to each other.

25. (Previously Presented) A card according to Claim 24, further comprising an insulating film,

wherein the display device and one of the first and second thin film integrated circuits are in contact with the insulating film.

26. (Previously Presented) A card according to Claim 20, further comprising:
an antenna; and
an insulating film,

wherein the display device, the first thin film integrated circuit and the antenna are in contact with the insulating film.

27. (Previously Presented) A card according to Claim 20, wherein the display device comprises a third substrate.

28. (Currently Amended) A card according to Claim 1 further comprising: an adhesive below the first thin film integrated circuit and the display device, and in contact with the first substrate.

29. (Previously Presented) A card according to Claim 28, wherein the adhesive is a photo-curing adhesive or a light curing adhesive.

- 6 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

30. (Previously Presented) A card according to Claim 28, wherein the adhesive includes a powder comprising one of silver, nickel, aluminum, and aluminum nitride or a filler.

31. (Currently Amended) A card according to Claim 20 further comprising: an adhesive below the first thin film integrated circuit and the display device, and in contact with the first substrate.

32. (Previously Presented) A card according to Claim 31, wherein the adhesive is a photo-curing adhesive or a light curing adhesive.

33. (Previously Presented) A card according to Claim 31, wherein the adhesive includes a powder comprising one of silver, nickel, aluminum, and aluminum nitride or a filler.

34. (New) A booking-account system using a card comprising:
a display device comprising a first semiconductor element comprising a first polycrystalline semiconductor film; and
a first thin film integrated circuit comprising a second semiconductor element comprising a second polycrystalline semiconductor film;
wherein the first thin film integrated circuit and the display device are covered and sealed with a resin between a first substrate and a second substrate, the resin being in contact with the second substrate,
wherein the display device is electrically connected to the first thin film integrated circuit and driving of the display device is controlled by the first thin film integrated circuit, and
wherein information is memorized in the first thin film integrated circuit and displayed by the display device.

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

35. (New) A booking-account system using a card according to claim 34, wherein the information is an account balance, amount of money of a transaction, a date, or an image of an owner of the card.

36. (New) A booking-account system using a card according to claim 34, wherein the first substrate and the second substrate comprise a plastic material.

37. (New) A booking-account system using a card according to claim 34, further comprising:

a second thin film integrated circuit,

wherein the first and second thin film integrated circuits are laminated.

38. (New) A booking-account system using a card according to claim 34, further comprising an insulating film, wherein the display device and the first thin film integrated circuit are in contact with the insulating film.

39. (New) A booking-account system using a card according to claim 34, further comprising:

an antenna; and

an insulating film,

wherein the display device, the first thin film integrated circuit and the antenna are in contact with the insulating film.

40. (New) A booking-account system using a card according to claim 34, wherein the display device comprises a third substrate.

- 8 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

41. (New) A booking-account system using a card according to claim 34, further comprising a second thin film integrated circuit comprising a third semiconductor element comprising a third polycrystalline semiconductor film;

wherein the first and second thin film integrated circuits are laminated to each other.

42. (New) A booking-account system using a card according to claim 34, further comprising an insulating film, wherein the display device and one of the first and second thin film integrated circuits are in contact with the insulating film.

43. (New) A booking-account system using a card according to claim 34, further comprising an adhesive below the first thin film integrated circuit and the display device, and in contact with the first substrate.

44. (New) A booking-account system using a card according to Claim 43, wherein the adhesive is a photo-curing adhesive or a light curing adhesive.

45. (New) A booking-account system using a card according to claim 43, wherein the adhesive includes a powder comprising one of silver, nickel, aluminum, and aluminum nitride or a filler.

46. (New) A booking-account system using a card according to claim 34, wherein the card has a thickness from 0.05 mm through 1.5 mm.

47. (New) A booking-account system using a card according to claim 34, wherein the display device is a passive matrix type display device.

- 9 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

48. (New) A booking-account system using a card according to claim 34, wherein the display device is an active matrix type display device.

49. (New) A booking-account system using a card according to claim 34, wherein the display device is a liquid crystal display device.

50. (New) A booking-account system using a card according to claim 34, wherein the display device is a light emitting device.

51. (New) A booking-account system using a card according to claim 34, wherein the card is an IC card including an ATM card, train pass, or a prepaid card.

52. (New) A booking-account system using a card according to claim 34, wherein the card is an ID card.

53. (New) A booking-account system using a card according to claim 34, wherein the card is a semi-hard card.

54. (New) A booking-account system using a card comprising:
a first substrate comprising a plastic material;
a display device comprising a first semiconductor element comprising a first polycrystalline semiconductor film over the first substrate;
a first thin film integrated circuit comprising a second semiconductor element comprising a second polycrystalline semiconductor film over the first substrate;
a resin over the display device and the first thin film integrated circuit; and
a second substrate comprising a plastic material over the resin, the resin being in contact with the second substrate,

- 10 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

wherein information is memorized in the first thin film integrated circuit and displayed by the display device.

55. (New) A booking-account system using a card according to claim 54, wherein the information is an account balance, amount of money of a transaction, a date, or an image of an owner of the card.

56. (New) A booking-account system using a card according to claim 54, further comprising:

a second thin film integrated circuit,
wherein the first and second thin film integrated circuits are laminated.

57. (New) A booking-account system using a card according to claim 54, further comprising an insulating film, wherein the display device and the first thin film integrated circuit are in contact with the insulating film.

58. (New) A booking-account system using a card according to claim 54, further comprising:

an antenna; and
an insulating film,
wherein the display device, the first thin film integrated circuit and the antenna are in contact with the insulating film.

59. (New) A booking-account system using a card according to claim 54, wherein the display device comprises a third substrate.

- 11 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

60. (New) A booking-account system using a card according to claim 54, further comprising a second thin film integrated circuit comprising a third semiconductor element comprising a third polycrystalline semiconductor film;

wherein the first and second thin film integrated circuits are laminated to each other.

61. (New) A booking-account system using a card according to claim 60, further comprising an insulating film, wherein the display device and one of the first and second thin film integrated circuits are in contact with the insulating film.

62. (New) A booking-account system using a card according to claim 54, further comprising an adhesive below the first thin film integrated circuit and the display device, and in contact with the first substrate.

63. (New) A booking-account system using a card according to claim 62, wherein the adhesive is a photo-curing adhesive or a light curing adhesive.

64. (New) A booking-account system using a card according to claim 62, wherein the adhesive includes a powder comprising one of silver, nickel, aluminum, and aluminum nitride or a filler.

65. (New) A booking-account system using a card according to claim 54, wherein the card has a thickness from 0.05 mm through 1.5 mm.

66. (New) A booking-account system using a card according to claim 54, wherein the display device is a passive matrix type display device.

- 12 -

Application Serial No. 10/739,084
Attorney Docket No. 0756-7232

67. (New) A booking-account system using a card according to claim 54, wherein the display device is an active matrix type display device.

68. (New) A booking-account system using a card according to claim 54, wherein the display device is a liquid crystal display device.

69. (New) A booking-account system using a card according to claim 54, wherein the display device is a light emitting device.

70. (New) A booking-account system using a card according to claim 54, wherein the card is an IC card including an ATM card, train pass, or a prepaid card.

71. (New) A booking-account system using a card according to claim 54, wherein the card is an ID card.

72. (New) A booking-account system using a card according to claim 54, wherein the card is a semi-hard card.

73. (New) A booking-account system using a card according to claim 54, wherein the display device is electrically connected to the first thin film integrated circuit and driving of the display device is controlled by the first thin film integrated circuit.
